Analytical and decisive leader with natural problem solving skills and proven success with advanced technical material. Competent researcher and independent learner with excellent written and verbal communication abilities. Able to excel in demanding environments while remaining pragmatic and focused

TECHNICAL TOOLBOX

JavaScript, HTML, CSS, Node.js, Express, MongoDB, MySQL, Bootstrap, jQuery, ES6, Handlebars.js, React, Redux, MERN stack, PHP, Laravel, AJAX, API/JSON, RESTful API, Active Record, State Management, Command Line, Mocha/Chai

GitHub, Version Control, Database Theory, MVC, Agile Methodologies, Research Methods, User Authentication, Social Coding Best Practice, Responsive Design, Quality Assurance Testing, Algorithms, Computer Science

FULL STACK PROJECTS

** Complete README sections are posted in the GitHub repos*

Kanban Inventory

<https://corey-inventory-app.herokuapp.com>

- Inventory application that will save companies time and labor costs associated with conducting inventory counts using Kanban principles
- Built with Sequelize, Express, React and Node.js

Reddit React

<https://coreys-reddit-react-project.herokuapp.com>

- Reddit style application where users can make posts about topics of their choosing
- Users can also create new categories and leave comments about existing posts
- This is a full MERN Stack application

Texas Beer Wars

<https://texas-beer-wars.herokuapp.com>

- Interactive web application designed to let users vote for their favorite Texan beer
- Built with Sequelize, Express, Node.js and jQuery using an MVC structure with a Mocha/Chai testing framework for the RESTful functionality

EDUCATION AND PROFESSIONAL EXPERIENCE

2017-Present

Freelance Web Developer

- Sharpening my development skills while attending the Coding Boot Camp at UT Austin
- Turning conceptual ideas into creative websites
- Experienced with all stages of the development cycle for full stack web projects
- Ability to assess an organization's needs and create websites that center on the user experience

2017

University of Texas at Austin

Coding Boot Camp

- A 24-week intensive boot camp dedicated to building full stack web applications
- Developed the foundation needed to acclimate to any programming language in an evolving industry
- Actively pursued challenging projects to expand skill set
- Completed on July 15th

2014-2016

Hometown Pizza, Jonestown Texas

Project Manager | Interim General Manager

- Created company website and programmed POS system
- Developed inventory and management systems
- Reduced food costs by 25% and labor by 30%
